

# More Hints About Projects...

## LABELING

The labels you use for your title and main ideas are very important because they direct the viewer's eye around your project.

One way to make your labels stand out is to have the writing on a light colored piece of paper with a darker background behind it. This can be done with construction paper, tag

board, or mat board. Dark black lettering makes your labels easier to read.

Photographs and written materials will also stand out more for the viewer if you put them on backgrounds as well.

## Be Careful of Clutter!

## PROJECT DESIGN

Although you will be able to explain your project during the initial judging, a successful project entry must also be able to explain itself. This makes it important that you design your project in a way that your photographs, written materials, and illustrations are easy to understand and to follow.

It is always tempting to try to get as much on to your panel boards as possible, but this usually makes for a cluttered and confusing display. Try to select only the most important items for your project boards. Clarity and organization are the most important goals for a project.
